PROFILE

Computer Science undergraduate with practical experience building full stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Skilled in developing REST APIs, integrating databases, and creating responsive, user-friendly interfaces. Eager to contribute as a full stack developer and grow in a collaborative, real-world engineering environment.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, C++, Java, SQL
- **Frontend Technologies:** HTML, CSS, React.js, Vite
- **Backend Technologies:** Node.js, Express.js, REST APIs, Socket.io
- **Databases:** MongoDB, MySQL
- **Concepts:** OOP, MVC Architecture
- **Tools:** Git, GitHub, Cloudinary
- **Development Practices:** Agile basics, version control, debugging

PROJECTS

University Assignment Portal | Full Stack Web Application

- Developed a full-stack University Assignment Portal using the MERN stack to streamline assignment submission and grading, replacing scattered email/WhatsApp workflows with a centralized platform.
- Built role-based access control with three distinct portals – Admin, Student, and Professor – for seamless user management and assignment tracking.
- Designed an Admin Panel to manage university departments and provision accounts for students and professors.
- Implemented a Professor Dashboard enabling educators to track, review, and Approve/Reject student submissions in real time.
- Integrated Cloudinary API for secure, scalable cloud storage and retrieval of student assignment uploads.
- Implemented real-time features using Socket.io to enhance platform interactivity and enable instantaneous updates.
- Configured RESTful APIs with Node.js/Express.js for authentication, file routing, and efficient database queries.
- **Live:** assignmentportal2026.vercel.app | **GitHub:** University Assignment Portal

Smart Blind Stick | Assistive Hardware-Software Solution

- Developed an assistive solution for visually impaired users, converting real-time sensor signals into audio.
- Processed real-time sensor data to detect obstacles and trigger alerts.
- Implemented an SOS feature to support emergency response scenarios.
- Tested system behavior across multiple scenarios to improve reliability and reduce false alerts.

SYSTEMS ENGINEERING EXPOSURE

- Understanding of RESTful APIs, client-server architecture, and database-driven systems.
- Familiar with scalable web application design and modular backend development.
- Experience working in agile-style development through academic projects.

ACTIVITIES EXTRA-CURRICULAR

- Assisted in organizing health camps, awareness drives, and community service initiatives on campus.
- Actively exploring frontend development trends and AI-powered web tools.
- **Soft Skills:** Adaptability · Communication · Team Collaboration · Curiosity

STRENGTHS

- Good analytical mindset with problem-solving ability.
- Adaptable to fast-paced environments and new challenges.
- Effective team collaboration and communication skills.

EDUCATION

Chitkara University, Himachal Pradesh
Bachelor of Engineering in Computer Science

Aug 2023 – Jul 2027
CGPA: 7.19 / 10.0
